

Förskoleknappen

- online and via the app!

Förskoleknappen (the Preschool App) is an e-service for parents and guardians with children at one of Eskilstuna Municipality's preschools.

It allows you to use straightforward mobile services to follow your child's day at preschool. By reducing administrative tasks, the staff will have more time to spend with your child.

You can find out more about how to use the service at www.eskilstuna.se/forskoleknappen.

To access the service, you will need to log in via your computer for the first time. You can log in using your e-ID, a quick, secure and increasingly common method for logging in to services on the internet. If you do not currently have an e-ID, you can apply for one from a service provider such as your bank.

Once you have logged in, you will enter your user details and create the user name and password needed in order to use the service via the app on your mobile phone or tablet.

You can download the Förskoleknappen app on your mobile phone from the App Store or Google play. Search for "hypernet direkt förälder".

You should then register your child's preschool schedule. This can only be done via the website and not via the app. Please note that a new schedule should only be submitted when the change applies for four weeks or longer. You can also register absence or planned leave for your child, either via the website or via the app.
