Social Science Programme

Samhällsvetenskapsprogrammet med undervisningspråk engelska

The International Social Science Programme is intended for students who are interested in how people and societies develop and function today in various ways. Other focus areas are History, Languages, Religions and Democracy.

The International Social Science Programme follows the syllabus for the Swedish Samhällsvetenskapsprogrammet (SA) using English as the language of instruction and communication.

You learn about social structures and people's living conditions from a national and global perspective. You broaden and extend your knowledge of various social issues through interpreting, explaining and applying the methods of the social sciences. You study International relations and focus on the United Nations' (UN) key issues. We give you the opportunity to prepare for language proficiency tests, i.e. Cambridge Certificate (CAE).
